Trung Hieu Dinh

trunghieudinh224@gmail.com | GitHub | Facebook | Ho Chi Minh City, VN | Fullstack Web Developer | Sub-leader

Education

Ton Duc Thang University — Ho Chi Minh City, VN
Bachelor of Computer Science - Information Systems — *2017 - 2021*

Work Experience

Web Systems Developer · Sub-leader — 2024 - Present
Marutou Compack Vietnam — *Ho Chi Minh City, VN*

- Promoted to Sub-leader in July 2026 while continuing hands-on web systems development and delivery.
- Led migration of legacy Java/NetBeans gas management systems into maintainable browser-based platforms.
- Architected and delivered internal systems for Japanese manufacturing and enterprise workflows, including asset tracking, operations, and reporting dashboards.

Freelance Fullstack Developer — 2023 - Present
Independent / Self-employed — *Remote*

- Built and shipped 20+ projects across Vietnam, Japan, the US, and Australia, including Rema Pilates, booking platforms, e-commerce, POS, B2B portals, and developer tools.
- Owned end-to-end delivery across requirements, architecture, Laravel/PHP, MySQL, Blade/JavaScript, payments, CMS/admin systems, testing, deployment, and production hardening.
- Implemented business-critical booking, resource scheduling, checkout, payment reconciliation, notification, reporting, RBAC, and automation workflows.

Cross-Platform Developer (Android / iOS / Web) — 2022 - 2024
Marutou Compack Vietnam — *Ho Chi Minh City, VN*

- Extended Android gas utility applications to iOS, maintaining feature parity and adapting workflows for mobile platform differences.
- Led web conversion of core Android app functionality into responsive browser-based systems for internal operations.
- Independently built Uketsuke Kun, a full gas communication web application, from requirements through production deployment.

Android Developer — May 2021 - 2022
Marutou Compack Vietnam — *Ho Chi Minh City, VN*

- Built and maintained Android applications for Japanese gas utility operations, covering field work support, data entry, API integration, and real-time reporting.
- Transitioned from fresher to Android development within 3 months while learning Java, mobile architecture, and Japanese business workflows.

Projects

Rema Pilates | *Laravel 13, PHP 8.4, MySQL, SePay, TTLock*

- Delivered the official bilingual marketing, booking, and studio operations platform at remapilates.com, covering scheduling, events, customer accounts, CRM, CMS, payments, refunds, reports, and RBAC.
- Implemented transactional resource locking, idempotent SePay settlement, automated lifecycle jobs, production deployment tooling, and TTLock smart-access workflows.

Candle Shop | *Laravel, PHP, MySQL, Stripe, Telegram Bot API, Reverb*

- Built a bilingual e-commerce platform with cart, checkout, Stripe payment, vouchers, order management, SEO/content settings, reviews, and admin dashboard.
- Implemented two-phase checkout, server-side voucher validation, dynamic shipping fees, invoice PDFs, and real-time Telegram/WebSocket notifications.

Nail Salon Booking Web | *Laravel, MySQL, JavaScript, Scheduler, Mail*

- Built a mobile-first white-label booking platform for US nail salons with a 5-step wizard, staff selection, customer CRM, gallery, reviews, technician profiles, and CMS.
- Designed slot availability for sequential multi-service appointments across staff schedules with transactional conflict checks and reminder automation.

Fabrico - B2B Uniform Platform | *Laravel, MySQL, Bootstrap, CMS, Analytics*

- Delivered a B2B ordering platform for an Australian workwear brand with industry browsing, personalization inquiries, wholesale order flow, admin CMS, contact inbox, SEO settings, and analytics cards.

Hyper Video Tool | *Node.js, SQLite, HyperFrames, FFmpeg, Edge TTS*

- Built a local-first tool for managing video projects, briefs, assets, scenes, templates, voiceover, preview, asynchronous MP4 rendering, snapshots, and output history.
