Trung Hieu Dinh

trunghieudinh224@gmail.com | GitHub | Facebook | Ho Chi Minh City, VN | Web & Mobile Developer | Fullstack Developer

Education

Ton Duc Thang University — Ho Chi Minh City, VN
Bachelor of Computer Science - Information Systems — *2017 - 2021*

Work Experience

Web Systems Developer — 2024 - Present
Marutou Compack Vietnam — *Ho Chi Minh City, VN*

- **Led migration of legacy Java/NetBeans desktop gas management systems** into modern web-based platforms, improving maintainability and browser-based access for internal users.
- **Architected and delivered internal web management systems** for Japanese manufacturing and enterprise workflows, covering asset tracking, operations, and reporting dashboards.
- Converted complex native workflows into responsive web interfaces while preserving business rules, data entry patterns, and real-time operational requirements.

Freelance Fullstack Developer — 2023 - Present
Independent / Self-employed — *Remote*

- **Built and shipped 20+ production projects** across Vietnam, Japan, the US, and Australia, including e-commerce stores, booking platforms, POS systems, B2B portals, and automation tools.
- Owned end-to-end delivery across Laravel/PHP, MySQL, Blade, Vanilla JavaScript/CSS, payment integrations, CMS, admin dashboards, hosting, deployment, and client handoff.
- Implemented business-critical flows such as checkout, voucher validation, staff scheduling, QR ordering, order management, real-time notifications, and SEO/content management.

Cross-Platform Developer (Android / iOS / Web) — 2022 - 2024
Marutou Compack Vietnam — *Ho Chi Minh City, VN*

- Extended Android gas utility applications to iOS, maintaining feature parity and adapting workflows for mobile platform differences.
- Led web conversion of core Android app functionality into responsive browser-based systems for internal operations.
- Independently built Uketsuke Kun, a full gas communication web application, from requirements through production deployment.

Android Developer — May 2021 - 2022
Marutou Compack Vietnam — *Ho Chi Minh City, VN*

- Built and maintained Android applications for Japanese gas utility operations, covering field work support, data entry, API integration, and real-time reporting.
- Transitioned from fresher to Android development within 3 months while learning Java, mobile architecture, and Japanese business workflows.

Projects

Candle Shop | *Laravel, PHP, MySQL, Stripe, Telegram Bot API, Reverb*

- Built a full e-commerce platform with bilingual storefront, cart, checkout, Stripe payment, voucher system, order management, SEO/content settings, reviews, and admin dashboard.
- Implemented two-phase checkout, server-side voucher validation, dynamic shipping fees, invoice PDFs, and real-time Telegram/WebSocket notifications to reduce payment and stock inconsistencies.

Nail Salon Booking Web | *Laravel, MySQL, JavaScript, Scheduler, Mail*

- Built a mobile-first white-label booking platform for US nail salons with a 5-step booking wizard, service/staff selection, customer CRM, gallery, reviews, technician profiles, and CMS.
- Designed slot-availability logic for sequential multi-service appointments across different staff schedules, including transactional conflict checks and reminder automation.

ProPOS - Fastfood POS | *Laravel, MySQL, QR Code, KDS, Vanilla JS*

- Built a QR-based restaurant POS with customer ordering, staff portal, table map, Kitchen Display System, owner dashboard, menu/table/staff CRUD, tax/service settings, and revenue reports.
- Implemented role-based portals and QR table sessions so customer orders, kitchen tickets, and owner reports stay synchronized without requiring app installation.

Fabrico - B2B Uniform Platform | *Laravel, MySQL, Bootstrap, CMS, Analytics*

- Delivered a B2B ordering platform for an Australian workwear brand with industry browsing, personalization inquiries, wholesale order flow, admin CMS, contact inbox, SEO settings, and analytics cards.

Memory Challenge | *Android Java, SQLite, XML UI, Material Components*

- Built a native Android memory game with timed multi-level gameplay, score bonuses, ranking, player setup, custom animations, sound/vibration settings, and multilingual UI.

Technical Skills

Frontend: HTML, CSS, Tailwind CSS, JavaScript, React, Blade, Bootstrap, responsive UI, animations
Backend: Laravel, PHP, Node.js, FastAPI, MySQL, MongoDB, Firebase, REST APIs, authentication, admin dashboards
Mobile: Android Java, iOS Swift, Flutter, Android XML, SQLite, SharedPreferences
Integrations: Stripe, Telegram Bot API, Google APIs, WebSocket/Reverb, email/PDF generation
Tools & Other: Git, Vite, Axios, Hostinger deployment, Chart.js, GSAP, Splide.js, Swiper.js

Highlights

5+ years of experience | 20+ shipped projects | 15+ technologies used | Fullstack web, mobile, admin systems, booking, POS, e-commerce, and automation
